

Look at these **MEDCO** merits!

**QUALITY
LUMBER**

GOOD QUALITY TIMBER MEDCO lumber is produced from excellent quality logs, produced from our own tree-farm.

UNEXCELLED MANUFACTURE MEDCO manufacturing facilities are complete and modern. Manufacture of MEDCO stock is unsurpassed.

SCIENTIFIC KILN DRYING MEDCO kiln facilities are the best. Kiln operation is in charge of experienced and skilled personnel. Accordingly, MEDCO kiln drying is uniformly superior.

RELIABLE GRADES All MEDCO lumber is graded, regraded and reinspected three to four times—first at the green chain, next after kiln drying, then behind the planer and finally on the shipping platform as it is loaded into the car.

CAREFUL LOADING Cars are carefully cleaned. They are loaded and braced in such a way as to help prevent shifting and damage in transit. Protective paper lining and door dust proofing is used as needed to assure best appearance possible on arrival.

It will pay you to standardize on MEDCO.

**DOUGLAS FIR — WHITE FIR
PONDEROSA PINE — SUGAR PINE**

Let us put the MEDCO representative in your area in touch with you.
